**NEW**

### Lubricant for chains and conveyor belt tensioners

**Application:** for lubrication of chains, conveyor belt tensioners and other metal components exposed to dirt and corrosion.

Lubricant for chains and conveyor belt tensioners is a specialized preparation, which perfectly adheres to metal, penetrates crevices and increases slip. Based on NSF ingredients, making it safe for skin and food products.

- excellent adhesion and crevice penetration
- dissolves and rinses away old grease - no removal required
- forms a thin, durable film resistant to loads and dirt
- preservative properties, protects against water and corrosion
- safe for skin and food products

## Copper Paste

**BESTSELLER**

**Purpose:** for bolts, nuts, spark plugs, flanges, threaded connections and metal surfaces requiring protection; do not use on aluminum components.

Copper Paste is a specialized assembly lubricant designed to protect metal components exposed to extreme temperatures and harsh operating conditions. It forms a durable protective layer that effectively prevents corrosion, seizing and abrasion, and facilitates disassembly even after long-term use.

- resists temperatures up to +1000°C
- protects against corrosion and oxidation
- facilitates assembly and disassembly of threaded parts
- reduces mechanical wear of parts
- protects joints against atmospheric influences

## Ceramic Grease

BESTSELLER

**Application:** threaded joints subjected to high temperatures, braking systems (guides calipers, rear of pads), manifold bolts, lambda probes, exhaust components, components subjected to high pressure and friction.

Ceramic spray lubricant is a high-temperature preparation with excellent lubricating and protective properties. It does not contain metals, so it does not conduct electricity and does not cause electrochemical corrosion. It forms a durable protective layer resistant to extreme temperatures and pressure.

- resists temperatures up to 1400°C
- prevents seizing of screws and metal connections
- protects against moisture, corrosion and salt attack
- very good lubricating properties
- metal-free - does not cause corrosion

## Copper Grease

BESTSELLER

**Purpose:** to protect parts from seizing, creaking and squeaking, and facilitates disassembly of threaded parts such as bolts and nuts.

Copper grease is a high-quality lubricant preparation with excellent sliding and anti-corrosion. The grease formula is based on copper. The product is resistant to water and extreme temperatures, which makes it reliable in harsh operating conditions.

- excellent lubricating properties and high adhesion
- effective corrosion protection even in harsh conditions
- resistance to moisture, water and high temperatures
- facilitates disassembly of seized and corroded parts
- reduces noise generated in moving parts
- high efficiency and long lubrication life

## Chain Grease

BESTSELLER

### with increased adhesion

**Application:** for lubrication of motorcycle, industrial and agricultural chains, including sealed chains (O-RING, X-RING, Z-RING).  
Synthetic, waterproof lubricant designed for road and off-road motorcycle chains, compatible with O- RING, X-RING and Z-RING chains. It is characterized by excellent penetrating properties, high adhesion and effective wear protection, which provides long-lasting chain protection in harsh conditions.

- high adhesion, water and dirt resistance
- excellent penetrating properties
- protects against wear and corrosion
- universal application - motorcycles, industrial and agricultural machinery
- prolongs service life of lubricated parts

## Teflon Grease

BESTSELLER

**Purpose:** for lubrication of precision mechanisms, guides, rollers, hinges, plastics, shutters, locks, chains, sliding mechanisms and other mating parts.

High-quality spray lubricant with Teflon (PTFE), providing long-lasting and effective lubrication in areas requiring high slip. Forms a tough protective layer that protects components from wear, moisture, dirt and corrosion.

- contains Teflon (PTFE) - minimizes friction
- excellent adhesion to various surfaces
- resistance to high temperatures and chemical agents
- protects against corrosion and acids
- does not attract dust and dirt

## GoldTech

### Strong penetrating rust remover

**Purpose:** for rust removal and maintenance of screws, nuts, hinges, mechanisms and other metal parts; preparation of surfaces for further processing, such as painting or lubrication; removal of corrosion from tools and machinery.

Strong penetrating rust remover is an advanced formulation designed to effectively remove rust and protect metal components from further corrosion. Thanks to its unique formula, it penetrates even the most inaccessible and corroded areas, "peeling" the oxide from the healthy metal surface. Facilitates the removal of seized bolts, nuts and other mechanical connections. The product leaves a protective layer that prevents the reappearance of rust.

- effective removal of rust and corrosion
- excellent penetrating properties even in hard-to-reach places
- facilitates unscrewing of seized and rusted parts
- Prevents re-rusting due to preservative properties
- easy to use and quick drying
- universal for various metals

### Dual-purpose preparation

**Purpose:** for loosening corroded threaded and tubular connections and joints.

Thanks to its cooling and penetrating properties, the dual-purpose preparation acts as a rust remover, while at the same time providing excellent lubrication, which prevents squeaking and creaking of components. The product is versatile - suitable for use on metals and plastics. It facilitates the cleaning of parts and provides them with solid protection against corrosion and wear.

- effectively loosens corroded threaded, pipe and joint connections
- penetrating and cooling properties allow fast action
- prevents squeaking and creaking due to excellent lubrication
- suitable for metals and plastics
- facilitates cleaning and protects parts from corrosion
- multifunctional - combines rust remover and lubricant in one product

## Clean Glass

BESTSELLER

### Glass cleaning liquid

**Purpose:** for cleaning glass, mirrors, glazing, glass display cases, porcelain, plastic, stainless steel and glaze.

Glass cleaner is a biodegradable, all-purpose product designed to effectively and safely clean a variety of glass surfaces and more.

- biodegradable and environmentally friendly
- effectively removes dirt
- leaves no streaks or runs
- universal application

## PowerRimTech

NEW

### Rim and aluminum cleaner

**Purpose:** for cleaning rims and aluminum surfaces, especially for stubborn dirt.

Rim and Aluminum Cleaner is an acid-based formulation for effective cleaning of car rims and other aluminum surfaces. It removes even difficult dirt, such as dried brake fluid, rust deposits from brake pads, oils or street dirt.

- strong action on hardly washable dirt
- effectively removes rust film and dried up stains
- suitable for aluminum and car rims

## ConcreteTech

NEW

### Concrete remover

**Purpose:** for cleaning construction machinery, concrete mixers, mixers, masonry boards, paving machines and hand tools.

ConcreteTech is a specialized formulation designed for effective removal of concrete and its residues. Ready-to-use, it facilitates quick cleaning.

- effectively removes concrete and its derivatives
- ready for immediate use
- universal application on various surfaces and tools
- makes it easy to keep machines and tools clean

## TruckTecWash

NEW

### Active foam

**Purpose:** for pre-washing delivery vehicles, trucks, tarpaulins, used in self-service car washes and foaming systems.

TruckTecWash is a high-quality concentrate for touchless washing of delivery vehicles, trucks and tarpaulins. Creates a dense foam, effectively removing stubborn dirt and insects.

- high efficiency and effectiveness of cleaning
- safe for paintwork and surfaces
- leaves no white residue
- pleasant scent
- universal for various cleaning systems

## DPF Cleaner

### Preparation for cleaning particulate filters

**Purpose:** for cleaning and maintenance of diesel particulate filters (DPF) in diesel vehicles.

DPF Cleaner is a concentrated, non-foaming agent designed to effectively remove carbon, soot and ash from diesel particulate filters. Restores full filter efficiency without leaving deposits.

- effectively dissolves and removes dirt from DPF filters
- does not cause foaming, which facilitates application
- restores efficiency and prolongs life of filters

## Engine Washing Fluid

BESTSELLER

**Purpose:** internal combustion engines, transmissions, drive bridges, other components of the drive train.

Engine Washing Liquid is a strong and effective cleaner, designed to remove dirt from engines and other automotive components. Thanks to its special formula, it perfectly deals with greasy stains, oils and technical deposits.

- strong degreasing properties
- protects against corrosion
- ready to use
- can be used on various engine surfaces
- quick action - effects already after 30 seconds

## Active Two-Component Foam

BESTSELLER

**Purpose:** for washing trucks, delivery vehicles, machinery and equipment, especially where safe cleaning of aluminum and other sensitive parts is required.

Two-component, active foam designed for effective cleaning with a foaming machine or direct spraying. The formula is safe for aluminum, making it ideal for removing dirt from aluminum components.

- effective removal of stubborn dirt
- safe for aluminum and other delicate surfaces
- versatile application: bodies, chassis, wheels, trailers
- easy application with foam gun or sprayer
- two-component formula increases cleaning efficiency

## Aluminum Cleaner

**Purpose:** for cleaning aluminum surfaces in trucks, trailers, machinery and industrial facilities.

Aluminum washing liquid effectively removes dirt from aluminum components of vehicles and machinery. The product is ideal for cleaning fuel tanks, aluminum covers, rims, industrial floors and trailer sides.

- effective removal of dirt and deposits
- specially dedicated to aluminum, does not damage the surface
- easy to use - fast action (about 60 seconds)
- can be applied with a sprayer or cloth

## ProfilTech

**NEW**

### Agent for maintaining closed profiles

**Purpose:** preservation and protection of closed profiles and hard-to-reach parts of car.

Closed profile preservative spray is a wax-based preparation that protects metal elements such as stringers, pillars or trunk lid from corrosion. It creates a durable protective coating, displacing moisture and protecting against the damaging effects of weather and salt.

- protects against corrosion and salt attack
- displaces moisture to form a durable protection
- 360° applicator allows easy access to hard-to-reach areas
- dense, non-flowing formula
- safe for lacquer, rubber and plastics

### Agent for easy drilling and threading

**Przeznaczenie:** wiercenie, gwintowanie, cięcie, szlifowanie, piłowanie oraz tłoczenie metali różnego rodzaju.

Środek ułatwiający wiercenie i gwintowanie to specjalistyczny preparat do obróbki metali, wspomagający takie prace jak wiercenie, gwintowanie, cięcie, szlifowanie, piłowanie i tłoczenie. Doskonale sprawdza się przy obróbce stali nierdzewnej, stali wysokostopowych, konstrukcyjnych oraz metali nieżelaznych i szlachetnych.

- effectively dissipates heat, preventing overheating of the material
- reduces tool wear and extends tool life
- improves the quality of metalworking
- versatile for various metals and machining work
